## OBJECTIVE

---

I am eager to gain real-world experience in web development and enhance my proficiency in the latest front end and back-end technologies. Looking for a responsible position in a reputable organization to expand my knowledge, and skills.

## TECHNICAL SKILLS

---

- **Python** – I possess a solid foundation in the language, covering the basics, .object-oriented programming, and advanced concepts.
- **Web Technology** - Proficient Knowledge in HTML, CSS and JavaScript for creating visually appealing, responsive, and interactive web solutions. Through practical application in projects, I have demonstrated the ability to create modern, user-friendly websites that meet functional and aesthetic requirements.
- **Oracle SQL** - Skilled in Oracle SQL with expertise in Data Types, DDL, DML, DCL, and TCL, and proficient in DQL (Joins, Subqueries). Strong ability to design and manage databases for optimal data manipulation.
- **Django** - I possess a solid foundation in the Framework, covering the basics.
- **React Js** - Proficient in React.js for building dynamic and responsive web applications with reusable components. Skilled in developing robust web applications using Django, with expertise in backend development and database management.

## PROJECTS

---

### 1. Food Hub (Web Application):

- It is an online Restaurant Project is a comprehensive software solution designed to facilitate the operation of a restaurant that hosts multiple vendors or food stalls within a single physical location or an online platform. This project typically encompasses both front-end and back-end systems to manage various aspects of the restaurant's operations efficiently. Overall, the Online Restaurant Project aims to streamline operations, enhance customer satisfaction, and drive revenue growth for restaurants that host multiple vendors under one roof or operate through an online platform.
- Software Requirements:
  - Frontend - HTML, CSS, JavaScript and Bootstrap
  - Middleware - Python
  - Database - SQL and PostgreSQL
  - Framework - Django

### 2. Daily Calorie Tracker (Web Application):

- This website will help you to maintain and keep track of daily food culture. Users can input the foods they consume throughout the day, including meals and snacks. The website calculates the total calories consumed based on the nutritional information of each food item and display in tabular and pie-chart format.

## WORK EXPERIENCE

---

### Central Operation Executive — Ntex Transportation services Pvt.Ltd (ElasticRun) Mar/2021 — July/2023

- Developed SQL queries to analyse customer data and identify patterns, resulting in a 20% increase in sales.

- Collaborated with cross-functional teams to identify business requirements and translate them into technical specifications for SQL database solutions.
- Vendor On-Boarding and Vendor Selection.
- Transit Time Maintenance and Follow-up for Timely Delivery and Documents Verification also creation of Customer Invoice and E-Way bill.

## PROJECT EXPERIENCE

---

### Full Stack Web Application

- ❖ Collaborated with cross-functional teams including designers, product managers, and QA engineers to gather requirements, plan project milestones, and ensure timely delivery of high-quality software solutions.
- ❖ Developed and maintained full-stack web applications using technologies such as HTML5, CSS3, JavaScript, React Js, and modern JavaScript frameworks/libraries like Django.
- ❖ Optimized web application performance by identifying and addressing bottlenecks, performing performance tests, and implementing caching strategies to enhance scalability and speed.
- ❖ Using server-side technologies like Python/Django to build robust back-end systems, handling database operations, user authentication, and authorization.
- ❖ Integrated third-party services and APIs (such as payment gateways, Google reCAPTCHA) to extend the functionality of web applications and enhance user experience.
- ❖ Conducted code reviews and provided constructive feedback to team members to maintain code quality, consistency, and adherence to coding standards.

## EDUCATION AND CERTIFICATIONS

---

- Certified Python Full Stack Developer  
Pyspiders, Basavanagudi – Bengaluru.
- Bhandarkars' Arts & Science College Kundapura – Bachelor of Computer Applications (2017 – 2020) - Percentage: 69%
- Government PU College Shankaranarayana, Kundapura – PCMB (2015 – 2017) - Percentage: 63.5%
- Government High School Siddapura, Kundapura – SSLC (2016 – 2017) – Percentage: 75.36%

## LANGUAGES KNOWN

---

- English
- Hindi
- Kannada

## DECLARATION

---

I hereby declare that the information mentioned earlier is true to my knowledge.
